### ABSTRACT

In this study, 702 specimens belonging to the genus *Medon* Stephens were examined. The material was obtained from various field trips between 2010-2019 by using aspirator, sifter, pitfall trap, berlese funnel and MSS trap methods. As a result of the study, 15 of the 22 known species from Turkey were identified. *Medon brunneus* (Erichson, 1839), *M. ferrugineus* (Erichson, 1840), *M. lanugo* Assing, 2004 and *M. subfuscus* Fagel, 1969 from the Aegean Region, *M. semiobscurus* (Fauvel, 1875), *M. abantensis* Bordoni, 1980 and *M. lamellatus* Assing, 2004 from the Central Anatolian Region are reported for the first time. Besides, *M. rufiventris* (Nordmann, 1837) is recorded for the first time from both the Aegean and Central Anatolian Regions. In addition, many new locality records of the recorded species were presented. The distributions of all *Medon* species in Turkey were mapped.

Türkiye'deki *Medon* Stephens, 1833 (Coleoptera: Staphylinidae: Paederinae) Cinsine Bağlı Türler Üzerinde Faunistik Araştırmalar

### ÖZET

Bu çalışmada, *Medon* Stephens cinsine ait 702 birey incelenmiştir. İncelenen materyal, 2010-2019 yılları arasında aspiratör, elek, çukur tuzak, berlese hunisi ve MSS tuzak yöntemleri kullanılarak yapılan arazi çalışmalarından elde edilmiştir. Çalışma sonucunda Türkiye'den bilinen 22 türden 15'i tespit edilmiştir. Bu türlerden, *Medon brunneus* (Erichson, 1839), *M. ferrugineus* (Erichson, 1840), *M. lanugo* Assing, 2004 ve *M. subfuscus* Fagel, 1969 Ege Bölgesi'nden, *M. semiobscurus* (Fauvel, 1875), *M. abantensis* Bordoni, 1980 and *M. lamellatus* Assing, 2004 İç Anadolu Bölgesi'nden ilk kez rapor edilmiştir. Ayrıca, *M. rufiventris* (Nordmann, 1837) Ege ve İç Anadolu Bölgeleri'nden ilk kez kaydedilmiştir. Ek olarak, birçok türe ait yeni lokalite kaydı verilmiştir. Türlerin Türkiye'deki yayılışları haritalandırılmıştır.

### INTRODUCTION

Schülke and Smetana (2015) listed 111 species of the genus *Medon* Stephens, 1833 from Palaearctic Region. After the catalog, eight new species were reported in this region. (Anlaş, 2015; Assing, 2016; 2018; Shibata and Fujimoto, 2017). Thus, the number of known species increased to 119. However, Assing (2013 a) added 31 of these species to Medonina incertae sedis list and reported that these species are suspicious species that must be confirmed, which may be included in other genera in the Medonina. Therefore, 88 species

from the Palearctic Region are known. These species are classified into five species groups called *Medon apicalis*, *M. ferrugineus*, *M. brunneus*, *M. fuscus* and *M. profundus* (Assing, 2014 a).

In Turkey, the genus *Medon* contains 22 species in four species groups (*M. apicalis* group, *M. ferrugineus* group, *M. brunneus* group, *M. fuscus* group) and nine of them are endemic to Anatolia (Anlaş, 2009; 2015). Seven species from the *M. apicalis* group (*M. assangi* Anlaş, 2015 (endemic); *M. beydaghensis* Fagel, 1969 (endemic); *M. caricus* Fagel, 1970; *M. maronitus*

(Saulcy, 1865); *M. reliquus* Assing, 2007 (endemic); *M. seleucus* Bordoni, 1975 (endemic); *M. subquadratus* Assing, 2004 (endemic)) with the highest endemism rate, are known and five of them are endemic for Anatolia. Three species are classified into the *M. ferrugineus* group (*M. dilutus pythonissa* (Saulcy, 1865); *M. ferrugineus* (Erichson, 1840); *M. rufiventris* (Nordmann, 1837)) and two species are classified into the *M. brunneus* group (*M. brunneus* (Erichson, 1839); *M. semiobscurus* (Fauvel, 1875)). The *M. fusculus* group (*M. abantensis* Bordoni, 1980; *M. fusculoides* Coiffait, 1969; *M. fusculus* (Mannerheim, 1830); *M. lamellatus* Assing, 2004 (endemic); *M. lanugo* Assing, 2004 (endemic); *M. lindbergi* Scheerpeltz, 1958; *M. lydicus* Bordoni, 1980; *M. meybohmi* Assing, 2007 (endemic); *M. solitarius* Assing, 2009 (endemic); *M. subfuscus* Fagel, 1969), which has the most diversity, is represented by 10 species and four of these species are endemic in Anatolia.

Ecologically, the *Medon* species are the most commonly inhabit the litter layer. In addition, it can be found in damp meadows and under the rocks near the stream. Species that associated with subterranean small mammal nests such as *M. ripicola* (Kraatz, 1854) and *M. castaneus* (Gravenhorst, 1802) are also known (Assing, 2006). There were also species recorded from the caves (e.g. *M. fusculus* and *M. semiobscurus*) (Anlaş, 2015). But most of them are not troglobionts.

The main purposes of the present paper were to contribute to determining the Turkish *Medon* fauna.

## MATERIAL and METHODS

Aegean and Central Anatolia Regions material was obtained from various field trips within two project supported by Scientific and Technological Research

Council of Turkey Projects between the years 2013-2019 (TÜBİTAK, Project no: 112T907 and 215Z080). Other regions material was collected between the years 2010-2019. Also, some of the material of the genus *Medon* found in the Alaşehir Zoology Museum, Manisa (AZMM) was re-examined. Samples were collected using aspirator, sifter, pitfall trap, berlese funnel and MSS trap methods. All material in this study is deposited in the AZMM.

Classification and nomenclature were made according to Assing (2004 a, 2007 a, 2013 a) and Schülke and Smetana (2015). Google Earth Pro was used to create the maps. All known records were used with the records in this paper while creating maps.

## RESULTS

A total of 702 individuals belonging to the genus *Medon* were examined and 15 of the 22 known species from Turkey were identified. These species;

### *Medon apicalis* group

#### *Medon caricus* Fagel, 1970

**Material examined:** **İzmir:** 1♂, 3♀♀, 25.XI.2014, Ödemiş, Bozdağlar, 38°24'46"N, 28°08'01"E, 950 m, berlese funnel, leg. Yağmur & Örgel. **Muğla:** 1♀, 21.V.2015, Dalaman, 36°53'37"N, 28°53'37"E, 127 m, sifter, leg. Yağmur & Örgel.

**Distribution in Turkey:** Aydın, Çanakkale, Isparta, İzmir, Muğla (Anlaş, 2009, 2015) (Figure 1).

**Distribution in the world:** The known distribution of *M. caricus* is confined to Amorgos Island (in the Aegean Sea) and West Anatolia (Assing, 2004 a, 2007 b; Anlaş and Rose, 2009; Anlaş, 2015; Schülke and Smetana, 2015).
